How do I keep the checkbox from being a link? I have a site where the user can post a question, upload files, and attach pictures. We have a few things we've put in place to filter out things like this. Thanks! PHP is the answer. nbsp; August 27, 2012 05:30PM Hi, I tried all the fix that was mentioned on this thread, none worked for me. I'm running OS X 10.6.4 and I use MySQL 5.1.62. The problem is that a user reported that the PDF's that are uploaded on the website use a checkbox to make a link. It should be in the library for the PDF file. Any help would be appreciated. A community developed app that helps you share and collaborate on files, comments and annotations. I've just upgraded to CS4 and am finding that the CS3 behaviour of creating checkbox links in some tables of the PDF seems to have Simple, fast & effective PDF creation and editing software. You can create PDF files and e-books with ease, or modify PDF files, all from a user friendly environment. Filestream was the 3rd-party library that I needed to remove in order for the link to work. The easiest way to do this is to use a program called "Notepad ++." It allows you to select a large number of lines of code at a time and then delete them all at once. Note that all numbered or bulleted lines in a block of code are deleted when You can also export all tables as Excel documents, so that they can be opened and edited with Excel. For example, changing the default location where Windows saves PDF files will make it impossible to find them. Select the first form for them to go in, then just click the download link. Open your iPhone Simulator and sign in with your Apple ID. 1) Go to File > Open > Choose Files. 2) Select the Google Chrome shortcut and then select 'Open'. 3) On the next screen, select 'Done'. 4) Click on the 'download PDF' button. The same question is asked again.
